

LEMP believes that a healthy BME voluntary and community sector is one where organisations have a chance to comment on draft proposals and policies that affect them before they are implemented, especially when they may have a direct bearing on their work. LEMP is keen to ensure that BME organisations have opportunities to engage in this work and as consultation documents seem to be coming thick and fast LEMP is trying to establish which organisations are interested in contributing to which policy strand. Please take a few minutes to complete the section below and we will contact you when something you have expressed an interest in comes up.

We recognise that funding and sustainability is a major issue for BME organisations and work on this at LEMP is ongoing. Please keep an eye on our website for funding information at www.lemp-leics.org.uk (Please tick as many as apply)

1. The geographical area we are interested in is:

- Local
- Regional
- National

2. The type involvement we would be interested in is:
